

RAJESH SANANGULA

Dell Boomi Integration Developer | iPaaS Consultant | API & Middleware Specialist | 8x Boomi Certified

Berlin, Germany | +49 15216189281 | sanangulrajesh9@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL PROFILE

Dell Boomi Integration Developer with nearly 4 years of hands-on experience delivering enterprise integration, API management, EDI/B2B, and event-driven architectures on the Boomi AtomSphere platform, connecting SAP, Salesforce, and ERP systems. Eight-time Boomi certified across Professional Developer, Associate Integration Architect, Administrator, Associate Integration Developer, EDI X12, API Design, API Management, and Linux Operational Administrator, with hands-on delivery across 50+ production integrations, 99.9% uptime, and a 75% reduction in operational errors through self-healing automation and structured RCA. Deep expertise in Boomi process design, Kafka/JMS event streaming, EDI/B2B trading partner onboarding (ANSI X12, EDIFACT, AS2), REST/SOAP API orchestration, and SAP-connected integration landscapes. Proven ability to own the full integration lifecycle — architecture, development, SIT/UAT, go-live, and cross-regional knowledge transfer. Based in Berlin, open to international relocation, available immediately.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) — Systems Engineer | Bangalore, India | 07/2022 – 04/2026

Client 2: Global LPG Energy & Logistics Provider (EMEA)
Global energy and logistics provider operating across 25+ countries in Europe and Asia.

Role: Integration & Automation Engineer / Site Reliability Engineer
Duration: 07/2024 – 04/2026

- Designed self-healing scripts and Boomi Atom health-monitoring automation for multi-tenant environments — reducing manual intervention by 95% and improving operational stability across EMEA.
- Delivered Boomi integrations via JMS, AS2, SFTP, and FTP. Built SAP → Boomi touchpoints for supply-chain process automation across European operations.
- Built Kafka-to-Boomi real-time event streaming pipelines with data transformation, eliminating batch-processing lag for EMEA supply-chain analytics.
- Migrated 10+ legacy integrations to modern Boomi iPaaS architecture. Designed reusable sub-processes for SAP IDoc transformation, cutting future build effort significantly.
- Participated in SIT, UAT, deployment planning, change management, and production releases across global Boomi integration landscapes.
- Owned incident tickets end-to-end: investigation, RCA, stakeholder communication, resolution, post-incident documentation. Authored runbooks and led knowledge-transfer sessions for 3 international teams (France, Netherlands and Germany).
- Configured Single Sign-On (SSO) across Dell Boomi, Confluent Kafka, and Azure services via enterprise Identity Provider (IdP).
- Applied working knowledge of SAP Business Technology Platform (SAP BTP) and SAP Cloud Integration (SAP CPI), including iFlows and adapters.

Key Projects

Monitoring & Self-Healing Framework for Enterprise Systems

- Built a reusable UNIX shell framework for proactive system monitoring, automated alerting, and self-healing across 30+ system components — reducing manual checks by 95% and improving MTTR. Stack: Boomi AtomSphere, UNIX Shell, Azure APIM, Confluent Kafka.

Real-Time Data Pipelines (Kafka Integration)

- Built end-to-end Kafka pipelines for real-time data streaming and transformation — replacing batch-based processing with near-real-time data delivery for analytics systems. Stack: Boomi AtomSphere, Confluent Kafka, REST APIs, XML/JSON.

Client 1: Fortune 500 Global Semiconductor Leader (USA, APAC & EMEA)
Fortune 500 semiconductor leader serving industrial, automotive, and consumer sectors across 30+ countries.

Role: Boomi Integration Developer & Support Engineer
Duration: 07/2022 – 07/2024

- Built and supported 50+ Boomi AtomSphere production integrations across SAP ECC, Salesforce, and ERP systems, maintaining 99.9% uptime and full SLA compliance.
- Reduced integration error rates by 75% through RCA, standardized retry logic, error-handling frameworks, and proactive debugging across all Boomi process pipelines.
- Configured EDI trading partner and B2B communication profiles (ANSI X12, EDIFACT, AS2) for secure, automated document exchange with 5+ trading partners.

- Developed API orchestration and Boomi process workflows connecting 8+ enterprise systems via REST/SOAP with automated data transformation and dynamic document handling.
- Built UNIX shell automation for real-time monitoring, alerting, and automatic recovery of Boomi Atoms/Molecules — reducing manual health checks by ~90%.
- Automated reporting dashboards for integration health visibility — saving 5+ hours/week for 3 EMEA support teams.

CERTIFICATIONS

- Dell Boomi Professional Developer Certification
- Dell Boomi Associate Integration Architect Certification
- Dell Boomi Administrator Certification
- Professional API Design Certification
- Professional API Management Certification
- Dell Boomi EDI X12 Associate Certification
- Professional Linux Operational Administrator Certification
- Associate Integration Developer Certification
- AWS Cloud Essentials Certification

IT SKILLS

iPaaS Platform: Dell Boomi AtomSphere (Professional, Administrator, Architect certified), MuleSoft

EDI / B2B: ANSI X12, EDIFACT, trading partner onboarding, communication profiles, B2B process management, EDI mapping

Messaging & Streaming: JMS, Confluent Kafka, AS2, SFTP, FTP, VAN

APIs & Web Services: REST, SOAP, JSON, XML, Flat File, CSV, OAuth, OData

ERP & CRM: SAP ECC / S4HANA (IDocs), SAP BTP, SAP CPI (working knowledge), Salesforce

Cloud & Networking: Azure APIM, AWS (Cloud Essentials), GCP, CI/CD deployment support

Monitoring & Support: System/application monitoring, self-healing scripts, incident management, RCA, ITIL-aligned support processes, production monitoring

Systems Administration: Unix administration, OS patching, user & access management, log analysis, resource optimization, Windows, Mac

Scripting: JavaScript, Groovy, UNIX/Linux shell scripting, Postman

Ticketing & Tools: Jira, ServiceNow, Cherwell, Git

Programming Languages: Python, SQL, Java (basics), C, HTML

Security & Identity: Single Sign-On (SSO), OAuth 2.0, Identity Provider (IdP), authentication, authorization

EDUCATION

2018 – 2022

Bachelor of Technology — Computer Science and Engineering (Score: 76%)

Chadalawada Ramanamma Engineering College, Tirupati, India (JNTU)

Anabin rating: H+ (highest German recognition tier — fully valid for EU Blue Card, no ZAB evaluation required)

AWARDS & RECOGNITION

- On The Spot Award — TCS (2023)
- Applause for Team Award — TCS (2024)
- Star Team Award — TCS (2024)
- Fresco Play Miles — TCS (2024)
- On The Spot (Team) Award — TCS (2025)
